

hi.

hi. My name is Miguel

**TRUMP
DONALD
.ORG**

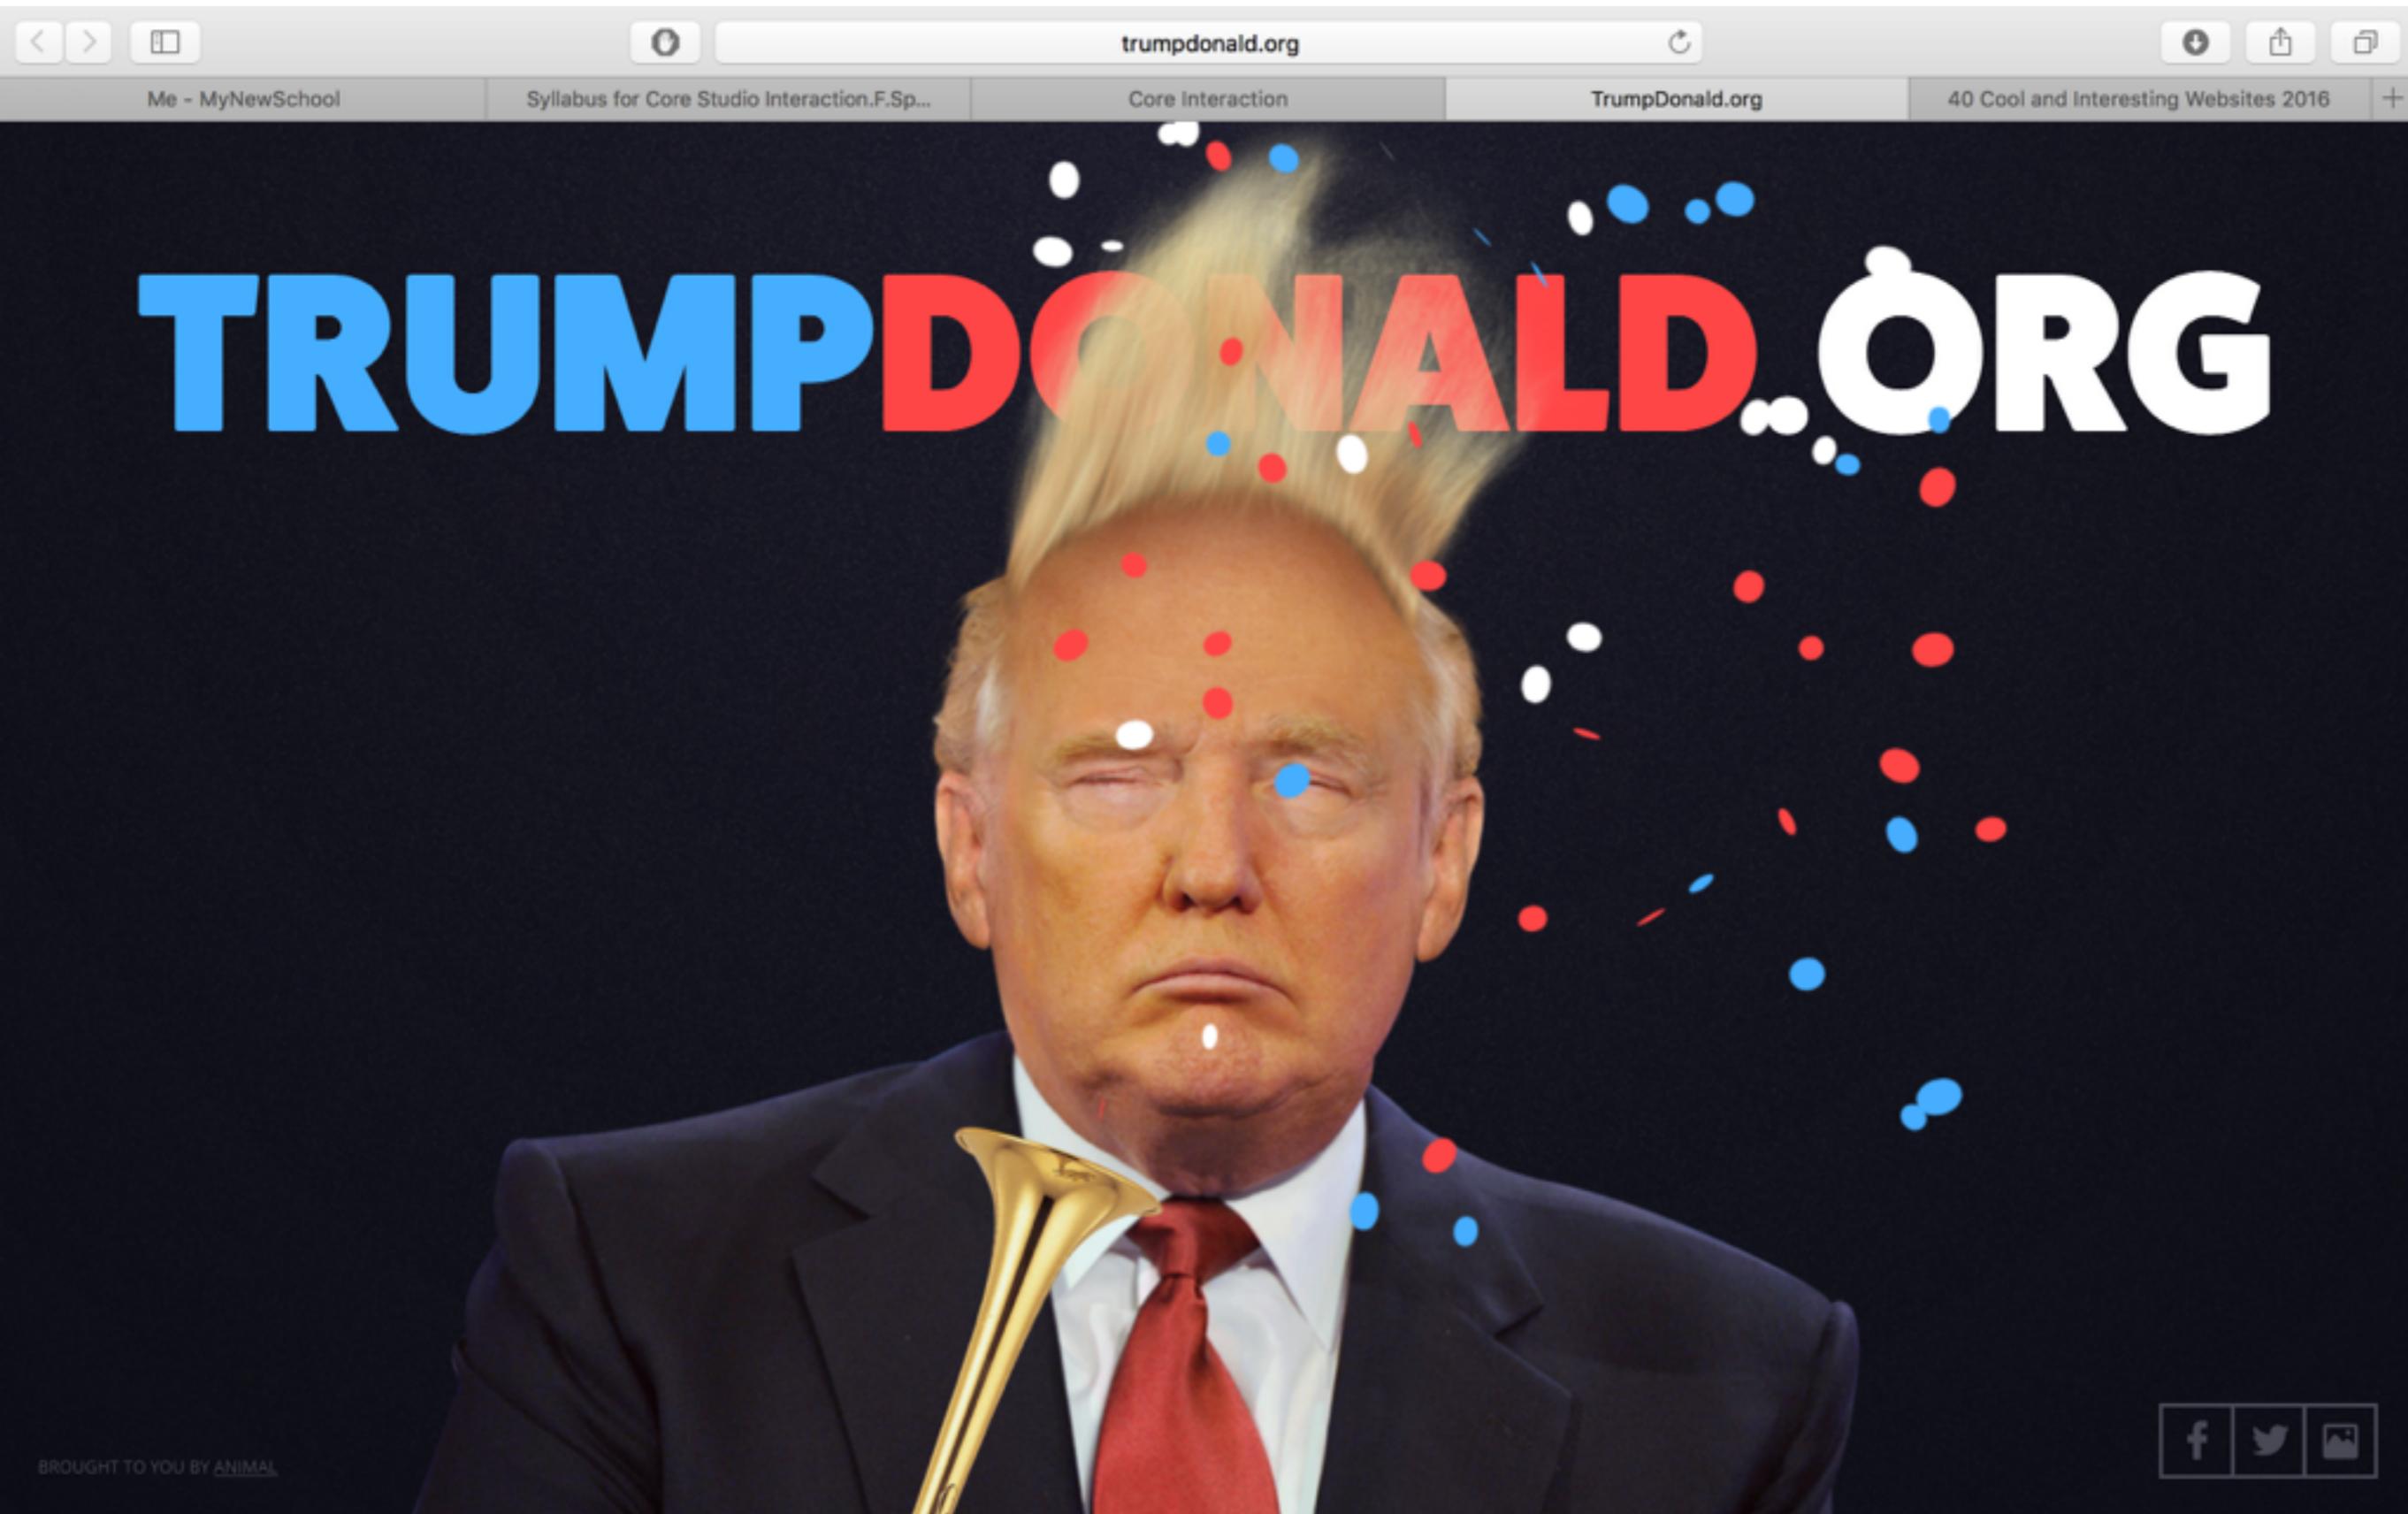

BROUGHT TO YOU BY ANIMAL

Thank you.

bye.

Formal:

colour scheme

animated

one typeface

organised as a centre

Functional:

you move the mouse and notice the trumpet move along as the website name says trump donald,

so i just clicked my mouse and there it happened.

I didn't expect his hair to go flying which i found humorous. Also,

sometimes they would shoot confetti out of the trumpet.

Conceptual:

it's purpose and instructions are clear and simple: Blow a trumpet on your president, thus resulting in entertainment. nothing more, nothing less.

Facebook for example keeps changing. There is no clear definition to what it really is.

same with snapchat it used to be an app where you could just send a picture to some that disappears, and now its much more than that.

this website has one simple task blow a trumpet at donal trump. it achieves it well.

Cultural:

Trump is a funny character, he's something you would see in a cartoon, and people have been using that to entertain people. it makes me laugh. The goal is a comic relief to people to don't like trump.
